

Thermal Hog Hunting

Fall 2021 High Pine Hog Harvest

Overview

High Pine Lodge offers some of Georgia's best fair chase feral hog hunting!

Experience

We offer a comfortable lodge environment with the high excitement of fair chase **real spot and stalk** thermal feral hog hunting. These are not hogs that come to feeders; these are straight up wildest of the wild feral hogs. They offer a hard earned and good honest wild game experience for those who want the thrill of the chase and harvest outside of a game preserve.

Activities

- Arrival 4pm
- Dinner 5-6pm roughly
- Hunting & Game orientation from guides 6-7pm
- Shooting and thermal scope orientation 7-8pm
- Hunt from 8-2am based on weather and light
- Hunt till you're done and then sleep and awake to a down home country breakfast/Brunch

Expectations

Hunters can expect to walk throughout the hunt. Walking on uneven ground is a skill that takes time and patience to master. Even the best hunters can fail at this during the daytime, so understand the making mistakes at night is highly likely. We mitigate this by hunting the wind. If a hunter steps on a twig and noise discipline is lost accidentally, we are set up to drive on. Hogs are super game animals, and they offer some of the best and most acute sensory skill sets not seen in other game species. A wounded hog is dangerous and needs to be humanely dispatched by the hunter or the guide will help with last rights. All guides are military veterans and characters who enjoy the sport and respect the game. We will do everything that we can to ensure that your fair chase hunting experience is enjoyable, and you will feel as though you've earned your hog and a good night's sleep.
